**Subject:** request for information

Hey Brenda,

We have a request for information under the Freedom of Information Act:

If you are not the right person for me to request this information, please forward to the correct person and provide me with their contact information.

The NC Health Hazards Control Unit is asking for EPA to provide our program with a complete list of **All** "on-line" Lead-Based Paint (LBP) activity training courses (abatement activities and RRP) approved by EPA to be taught in the US.

This would include lead inspector, risk assessor, supervisor, worker, designer, dust sampling technician and renovator course disciplines.

This would also include each language that each of these on-line LBP course disciplines may be taught in.

This would include the name of each company, the address, primary point of contact, telephone number and which lead-based paint course discipline(s) the company can teach on-line.

This would include any company currently accredited to teach an on-line LBP course(s) and any company with an expired accreditation who had an on-line LBP course approved by EPA .

If you have any questions, please feel free to contact me.

Thanks,

jeff

**Subject:** SELC Meeting/Training, May 1-5, 2016 (Required Grant Commitment for Region 4 LBP Program)

**Importance:** High

Let me know if you need another email (like the one below) in order to get permission for the May, SELC meeting/training in Savannah, Georgia. Thanks. Brenda

*"Your Grant with EPA requires that State staff participate in the EPA meeting/training for the Lead-based Paint Program. The meeting/training on May 1-5, 2016, includes EPA updates on lead regulations and grant implementation and reporting, program certification, e-learning and other lead training/information. Therefore, your staff is required to attend.*

*In addition, the training will include necessary presentations on changes in funding, program authorization and implementation, to meet your grant reporting requirements."*
